Liquid Vinyl

Interior Exterior 100% Acrylic

THE PROFESSIONAL'S CHOICE FOR OVER 60 YEARS!

Liquid Vinyl has been formulated specifically for the harsh Rocky Mountain environment. This versatile interior/exterior architectural finish is one of our most popular water-based product choices among professionals.

Customers are consistently satisfied with the outstanding performance that **Liquid Vinyl** provides for all of their painting projects. **Liquid Vinyl** can be applied on: wood, drywall, concrete, masonry, hardboard siding, primed ferrous and non-ferrous metal.

AVAILABLE IN SATIN FINISH

Liquid Vinyl is available in more than 1600 fashionable colors from our exclusive **ColorLife®** system. A custom color matching service is also available at our stores and makes your color selection virtually limitless.

For use on new or previously painted surfaces, **Liquid Vinyl** assures **superior** and **uniform** finish results.

- 100% acrylic formula for extreme durability
- Premium quality with a rich satin finish
- Low VOC (Volatile Organic Compounds)
- Outstanding hide and coverage with resistance to moisture, chalking and weathering
- Universal application on multiple substrates
- Excellent adhesion on all applications
- Fast drying, low odor, easy soap and water clean up

TITAN™

UltraTech®

ECO LATEX DRY FALL FLAT

UltraTech C158 Interior latex

flat dry fall is an ECO-friendly low VOC commercial quality reflective coating designed for interior ceilings and overhead surfaces. It provides a dry fall distance of 10 feet under normal conditions* which makes it ideal for use on gymnasiums, commercial warehouses, factories, retail outlets, parking structures and other facilities where overspray cannot be tolerated.

- *Good hide and coverage - No show-through from the surface that is being painted*
- *Dry fall distance of 10 feet* - Reduces the cost of masking and covering procedures*
- *Good adhesion- Results in a longer lasting paint job because the paint is less likely to blister, paint or peel*
- *Light reflectance of 88% $\pm$ 2% - Increases lighting efficiency and promotes a safe working environment*
- *Good flash rust resistance - Minimizes surface imperfections*
- *Low VOC content of 50 g/L*
- *Not manufactured with lead, mercury or chromium containing materials - suitable for use in USDA inspected facilities*

*At 77°F (25°C) and 50% relative humidity, dries to touch in 15 minutes and to recoat in two hours. Low temperature (air or surface), high humidity, thick films or poor ventilation will increase these times and dry fall distances. Enclosed areas must be ventilated well to minimize excessive moisture build-up during application that can adversely affect dry time, dry fog characteristics and adhesion. A test application to determine if drying performance is satisfactory for a given application is recommended. NOTE: Tinting and thinning will affect the dry fall properties of this product by extending the fall distance necessary for overspray to dry.

Accu-Shield

Exterior Acrylic Satin

THE PROFESSIONAL'S CHOICE FOR OVER 60 YEARS!

Accu-Shield has been formulated specifically for the harsh Texas environment. This versatile exterior architectural finish is one of our most popular water-based product choices among professionals.

Customers are consistently satisfied with the outstanding performance that **Accu-Shield** provides for all of their painting projects. **Accu-Shield** can be applied on: wood, drywall, concrete, masonry, hardboard siding, primed ferrous and non-ferrous metal.

AVAILABLE IN FLAT, SATIN AND SEMI GLOSS FINISHES

Accu-Shield is available in more than 1600 fashionable colors from our exclusive **ColorLife®** system. A custom color matching service is also available at our stores and makes your color selection virtually limitless.

For use on new or previously painted surfaces, **Accu-Shield** assures **superior** and **uniform finish results**.

- 100% acrylic formula for extreme durability
- Resistance to mildew and mold
- Low VOC (Volatile Organic Compounds)
- Outstanding hide and coverage. Excellent resistance to moisture, chalking and weathering
- Universal application on multiple substrates
- Excellent adhesion on all applications
- Fast drying, low odor, easy soap and water clean up

Premium Translucent Wood Finish 7400 Series

- Bolstered pigments, mildewcides and water repellents for protection in severe environments
- For vertical wood such as log homes, siding, trim and doors
- Alkyd resins and a two oil system create a hard yet flexible finish
- Apply over previously stained surfaces or on bare wood
- Satin finish for a moderate sheen
- Gloss finish for a high shine “wet look”

WHY CHOOSE PREMIUM TRANSLUCENT WOOD FINISH? TO PROTECT YOUR INVESTMENT!

EASY SURFACE PREP, EASY AND COST EFFECTIVE APPLICATION Apply 2 coats of Premium Translucent Wood Finish using a brush, roller or sprayer. Other products have complicated application instructions and require application of 3-4 coats. Premium Translucent Wood Finish saves you time and money!

LONG TERM DURABILITY AND UV PROTECTION Long lasting high quality transparent oxide pigments give Premium Translucent Wood Finish excellent color retention that reflects the powerful UV rays that fade, gray and damage wood.

LESS MAINTENANCE The transparent film forming system of Premium Translucent Wood Finish is a technologically advanced microporous alkyd resin containing two oils for a hard yet flexible finish which give superior water protection, minimizes peeling and blistering, and won't crack or peel for 4-6 years! Other products require a recoat every 2-3 years.

CHOOSE SATIN OR GLOSS FINISH Premium Translucent Wood Finish gives a durable and rich look with a satin sheen or high gloss finish. Not sure which to choose? Just ask your retailer for a sample can of product or call our customer service at 800-825-5382 for assistance.

USE ON BARE WOOD OR OVER EXISTING STAINS Premium Translucent Wood Finish may be applied directly to bare wood; most competitive products can not be applied to bare wood. Premium Translucent Wood Finish may also be applied over existing stains that are in good condition.

COLOR CHOICES FOR THE DISCERNING HOMEOWNER Use Premium Translucent Wood Finish over many of our Superdeck® wood stains for multiple color options.

DUCKBACK PRODUCTS, P.O. Box 980, CHICO, CA 95927 USA

Deck & Dock Elastomeric Coating 3100 Series

- Perfect choice to refinish old and damaged wood and concrete surfaces instead of replacing them
- Use on exterior wood decking, boat docks, plywood decking, composite decking, ramps, fences, rails, wood siding, balconies, porches, stairs, walkways, as well as concrete, masonry and stucco surfaces
- High build elastomeric formula fills cracks
- Maximum hide with long lasting protection
- 4 ready to use colors, tintable to over 50 colors
- Limited Lifetime Warranty

Anti-Skid Additive 6310

- Add to coatings to create a slip resistant surface
- Perfect for decks, docks, stairs, ramps, poolsides and more
- Made from 100% ground walnut shells
- Use one pack of Anti-Skid Additive for each gallon of coating
- Pairs perfectly with Superdeck Solid Color Stain, Deck & Dock, and all Mason's Select concrete stains and sealers
- Anti-Skid product meets recommended standards set forth by the Americans with Disabilities Act (ADA).

DECK & DOCK PERFORMANCE RESULTS

Product was tested using American Standard Testing Methods (ASTM) to determine product performance.

1) Chemical & Stain Resistance	2) Resistance to Water Immersion & Freeze Thaw	3) Adhesion To Wood	4) Adhesion to Concrete	5) Cold Temperature Coalescence	6) Elongation & Tensile Strength
Stains-63/64 Chemical-52/64 Product has excellent resistance to stains and strong resistance to chemicals.	No blistering occurred. Product has excellent resistance to water immersion and freeze thaw cycles.	Tape Adhesion = 5A no removal of coating. Scrape Adhesion = no removal of coating. Product has excellent adhesion to wood.	Tape Adhesion = 5A no removal of coating. Product has excellent adhesion to concrete	Film cracking = none. Product will not crack in cold temperatures.	Elongation = 185%, Tensile Strength = 260 psi, Tear Strength = 99 lbs. per inch. Product has excellent elon- gation, tensile strength and tear strength.
7) Water Vapor	8) Resistance to Sodium Hydroxide	9) Mandrel Bend Flexibility	10) Shore A Hardness	11) Flammability and Flash Point	12) VOC & Hazards
Dry Cup = 1.08 US Perms. Wet Cup = 32 US perms. Product has excellent breathability.	Product Passes. No effect from chemical immersion test.	Product Passes. No signs of stress crack failure. Product has excellent flexibility.	Durometer Reading = 55. Product is hard yet flexible and can withstand expansion and contraction of substrate.	None. Product is not flammable and is non- combustible.	Product is a low 50 VOC g/l. Product contains NO hazardous air pollutants, and NO phosphates.
