Comex
USA

SOLUTION DRIVEN DRYWALL PRIMERS

Comex, working with Architects, Owners and Painting Contractors, has developed a full line of drywall primers to provide specific solutions for common drywall problems that affect the appearance of the finish coat.

If you demand the highest level of performance and appearance or are looking for innovative solutions that will help get the job done, Comex UltraTech® or UltraCraft has the solution.

S-Lock Technology found exclusively in UltraTech products allows the sealer to penetrate into the texture, and drywall sealing the surface. Once UltraTech drywall primers containing S-Lock Technology are applied to the surface and cured, finish coats will see a dramatic improvement in touch-up, washability, and scrubability.
