

High Performance Deck Screws

2-3/4" coated steel screws for use in wood & composite decking. The 3 ring design draws material down to prevent mushrooming and a 6 lobe drive to help reduce spinout.

Available in 4 colors to match board:
Brown, Cedar, Redwood, and Grey

Softwood Fasteners

Stainless steel and coated steel drive-in fasteners for use in solid edge softwood deck boards. 2 different fasteners available.

Composite & Hardwood Fasteners

Stainless steel drive-in fasteners for use in solid-edge composite, PVC, Mahogany, Ipé, and Exotic Hardwood decking. Different fasteners available for decking brands and types.

Grooved Board Fasteners

Stainless steel fastener for use in pre-grooved decking or non-grooved decking with the use of a slot cutter.

Recommended Decking:

Portico, Fiberon, Truemark, Veranda, Latitudes, Tropics, Horizon WeatherReady, and other grooved deck boards.

The Tiger Claw Installation Gun

The Tiger Claw Installation Gun is a semi-automatic installation tool that dramatically reduces installation time of our grooved fasteners. The installation gun not only reduces installation but increases productivity and customer satisfaction.

Recommended Fasteners:

Tiger Claw's TC-G (TC-150), TimberTech CONCEALoc clips, and the Trex HideAway fasteners

The Tiger Jaw

The Tiger Jaw eliminates the need for a sledge hammer when installing certain drive-in fasteners. The Tiger Jaw is placed over 2 or 3 boards, once in place the lever is pushed squeezing the deck boards into place.

Recommended Fasteners:

TC-3S, TC-4S, and ProClip fasteners
