High Performance Deck Screws

Performance Features

One screw for both wood and composites.
One size for both 5/4" and 1 1/2" boards.

Tiger Claw, recognized as the industry leader in hidden deck fasteners, now offers High Performance Deck Screws, the only screw you'll need for both wood and composite materials. The one-size 2 3/4" screw conveniently handles both 5/4" and 1 1/2" thick decking boards and is compatible with ACQ preservative treatments.

Manufactured to meet the highest quality Tiger Claw standards, High Performance Deck Screws are designed specifically to make your job faster and simpler. Their advanced head and thread design allows quick starts and easy driving compared to the competition. High Performance Deck Screws automatically countersink and prevent material mushrooming, giving you a professional look every time. They're available in Driftwood Gray, Redwood, Brown and Cedar colors to more effectively blend with most decking colors.

Find the correct screw for your deck
